

SPECIFICATIONS FOR CREATING A DVD-VIDEO/DVD-ROM MASTER

1. Use good quality media
2. We do not accept masters on re-recordable discs.
3. In the event of supplying DDP files, the master must be saved in DDP 2.0 format
4. Use 2x burn speed
5. It is recommended that a copy of the master is supplied
6. Check that both discs work properly.
7. For DVD-9 discs, it is necessary for the master supplied to be described for each layer respectively.
8. Please contact our Authoring Department to find out about protecting against copying
